

# **MAAK IMPEX ANTIVIRAL COATING FOR SHRINK WRAP**

## **ADVANTAGES OF OUR ANTI VIRAL SHRINK WRAP**

- **Excellent Cling**
- **Low supply cost**
- **Versatility of sizes – load types**
- **Will not damage or adhere to product**
- **Very high Impact strength and Puncture resistance**
- **Better elongation – 300 %**
- **Reduced freight costs**
- **Keeps products clean**

## Our Products

### **Hand Wrap SHRINKWRAP**

Hand wraps, as the name suggests is used manually in order to unitise and pack products. Used primarily in simple packaging. Available in sizes ranging from 2" to 60" width and primarily extruded in thickness of 23 micron.

### **Machine Wrap SHRINKWRAP**

Machine wraps are films used to pack and unitise products with the help of an automatic stretch wrapping machine. This is primarily used for industrial purpose where optimum usage of film is required to cut down on the cost, time and labour. The speciality of this film is that it has high strength and greater puncture resistance even after the film is stretched beyond 300%. Available in sizes ranging from 2" to 60" width and thickness of 29 microns.
